Therefore, Mr. Mantell's presentation might call the conventionalized char-acter generations of actors have pro-duced, at the same time contained that mark of individuality which showed that at times Mr. Mantell dared depart from the sacred acting versions which his forerunners held to so religiously. His scenes with Polonius, with the His scenes with Polonius, with the players, with the queen and in the duel with Laertes were the best of the play, as we viewed it. In these instances he gave a more delicate reading to the lines and a more artistic touch to their interpretation. The big scene with the king and the players and the reading of the soliloquy, were too declamatory and a bit theatrically forced as compared to the Forbesforced, as compared to the Forbes-Robertson and Sothern interpretations. Through it all Mr. Mantell gave a studious conception of the character In the supporting cast the Polonius

Mr. Peters had evidently given the part much study and his given the part much study and his reading of the tongue tripping lines was clear and distinct while his intelligent shading gave no chance for mistaking their full meaning. Miss Hamper's Ophelia was at times given an intensely human quality that was most appealing. The work of Edward Lewers, as the gravedigger, stood out clearly, though it was a bit heavy.
